0! fiat 1

Šis archyvas sudarytas pagal vienos didžiausių duomenų bazių kalbos protokolus. Pagal kiekvieną protokolą parenkami skaitvardžiai nuo vieno iki dvylikos imtinai. Skaičiuojama kiekvieno iš šių skaitvardžių gramatinių ženklų suma, prilyginant žodinę skaičiaus išraišką atsakymui, laikant, jog skaitvardžio reikšmė nurodo jį sudarančių ženklų skaičių. Skaičių išdėstymo schemose pamatu imamas ciferblatas, kada skaičius, į kurį nurodoma, virsta ciferblato ašimi. Pačių schemų išdėstymas remiasi abėcėline tvarka.

This archive is compiled according to the language protocol of one of the largest databases. According to each protocol, numerals are selected from one to twelve inclusively. By equating the answer to the expression of numbers as words, considering that the meaning of the numeral is taken as a reference to the number of its characters, the sum of all characters that make up each of the numerals is calculated. The numbers in the schemes are arranged on a basis of a dial, when the number, which is referenced, becomes its axis. The schemes themselves are laid out in alphabetical order.
