

ROMAN IMPERIAL HOARDS OF DENARII FROM THE EUROPEAN BARBARICUM

Abstract: The publication presents a complete and up-to-date list of Imperial denarius hoards from the European Barbaricum with a very basic comment. It is not intended to be a detailed catalogue of hoards, but only a starting point for more detailed searches and studies.

Keywords: *denarius, imitative denarius, Roman Empire, Barbaricum hoard.*

In the territory of the European Barbaricum at large, i.e., the region which remained outside the borders of the Roman Empire, both hoards and other finds of Roman coins demonstrate a strong preponderance of 1st–2nd century denarii, late Nero (54–68) to early Septimius Severus (193–211). For this reason, a complete and up-to-date list of Imperial denarius hoards from this area is crucial for research on the influx and use of Roman coins in the European Barbaricum. The most recent lists of hoards and other important finds of Roman denarii from the entire European Barbaricum were published by Lennart Lind in 1981¹ and Tomaso M. Lucchelli in 1998.² These publications have become outdated, first of all due to a large number of new hoards that were recorded during the recent two decades.

This newly presented list is intended to cover all Roman Imperial denarius hoards (i.e., hoards consisted mainly of denarii and other silver coins and/or gold coins) containing at least 10 denarii, of which at least 1 piece has been dated to the period from Nero to Septimius Severus (recorded without doubt or very likely expected to occur within a hoard). Denarius hoards including only Republican and/or Imperial issues dated to the period before Nero have

been not taken into account³. The list includes only very basic data, given in less detail than in publications of L. Lind and T. M. Lucchelli. It is not intended to be a detailed catalogue of hoards, but only a good starting point for more detailed studies by any researcher interested in coin finds from the entire European Barbaricum or its particular regions. Obviously, the list could also be useful as a general material which can be used to make comparisons, draw maps (see map 1), etc.

The term European Barbaricum is understood to cover the areas lying outside the Roman Rhine, Danubian and British limites in the end of the 2nd century AD, to the Volga river in the east, but not including the Caucasus region and the Black Sea coast. These are: parts of present-day Austria, Hungary, Serbia and Slovakia lying on the left Danube bank, part of present-day Germany lying on the left Danube bank and on the right Rhine bank (with the exception of the Agri Decumates, the area between the Upper Rhine and the Upper Danube), part of present-day Netherlands lying on the right Rhine bank, northern parts of the United Kingdom (the area north of Hadrian's Wall⁴ and Northern Ireland), present-day Romania (with the exception of a large territory of the Roman province of Dacia), and present-day Belarus, Czechia, Denmark, Estonia, Finland, Ireland, Latvia, Lithuania, Moldova, Norway, Poland, western Russia (with the exception of the Black Sea coast and the Caucasus region), Sweden, and Ukraine (with the exception of the Black Sea coast). So far, no Roman denarius hoards have been recorded in Estonia, Finland, Ireland,

³ Due to the Roman occupation of the territories between the Rhine and the Elbe rivers in the reign of Augustus it could be hard to distinguish between finds in Roman and in non-Roman contexts. There is a similar problem in present-day Romania, where a huge number of pre-Trajanic (first of all Republican) denarii was hoarded. Most of these hoards should be linked to Dacian contexts, but some of them could have been connected with Roman contexts within the Roman province of Dacia, established by Trajan. In other territories of the European Barbaricum pre-Neronian denarius hoards are very rare.

⁴ Excluding hoards linked to Roman sites or Roman activity.

Latvia and Norway.

The structure of individual hoard entries in the attached list (prepared as a table) is presented below (next to sequence number, findspot and country, which are obvious).

Latitude and longitude – in most cases coordinates are given for the city/town/village in which a findspot is located; only in very few cases precise coordinates of findspots are disclosed.

Number of denarii (incl. eastern drachms) – estimated number of denarii in a hoard, including eastern drachms of a weight and silver standard similar to denarius, issued within the Roman Empire (e.g., Lycian, or Cappadocian drachms).

Number of recorded denarii (incl. eastern drachms) – number of denarii recorded within a hoard, including eastern drachms.

Number of recorded denarii (official issues, incl. eastern drachms) from Nero to Sept. Severus – as above, but only number of coins from Nero to Septimius Severus, excluding barbarian imitations and other issues determined as unofficial.

Earliest recorded denarius – period (e.g., Republic) or reign of an emperor to which the earliest denarius in a hoard is dated.

Latest recorded denarius – reign of an emperor to which the latest denarius in a hoard is dated.

Recorded imitative denarii (Y/N) – are there any imitative denarii (especially any barbarian imitations) recorded in a hoard: yes or no.

Number of coins other than denarii (or eastern drachms) – number of coins other than denarii (or eastern drachms issued within the Empire), e.g., Roman base metal coins, antoniniani, siliquae, solidi, or drachms (e.g., Apollonia and Dyrrhachium drachms) and tetradrachms (e.g., Thasos tetradrachms) issued outside the Roman territory.

Latest (recorded) coin other than denarius – type of non-Roman coins (e.g.,

Apollonia and Dyrrhachium drachms), or period (e.g., Republic) or reign of an emperor to which the oldest coin other than denarius in a hoard is dated.

Objects other than coins (Y/N) – are there any objects other than coins (ornaments, clasps, Germanic bracteates, etc.) recorded in a hoard: yes or no.

Other possibilities of dating (objects other than coins, vessel, archaeological context etc.) – dating of deposition of a hoard based on evidence other than coins.

Basic reference – no more than two more important references, to the inventories of finds if possible.
